## DETAILED ACTION

### *Claim Objections*

Claims 4-25 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-25 have not been further treated on the merits.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Us Patent 6,135,262 (Pölling).

The '262 patent teaches a device for sorting products, which comprises adjacently arranged supporting units, 1, which are movable in a direction of transport along a conveying path, each supporting unit being provided with at least one load carrying platform, 3, comprising a supporting surface for supporting a product. The load carrying platform is supported by a support member, 9, which can be tilted about an axis. The conveying element is movable along a guide, 13, extending according to the conveying path. The titling means comprises at least one cam, 21, which can be rotated by a drive means and rotation of the cam over a camway causes the support member to tilt. The camway forms part of the supporting member, and extends in the radial direction with respect to the tilt axis, see figure 4a and column 7, lines 6+.
